

# Bucket Safety Hooks

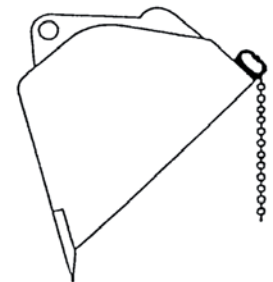

## Features:

- Weld-on bucket hooks for lifting applications
- Patented design & sturdy safety latch
- "C" and "U" shape insures top safety
- Available in a range of sizes to accomodate weights of 0.5 - 18 tons

*"C" Type installed on an excavator.*

*"U" Type installed on a loader.*

## Type C - For excavators

The PEJO Safety Hook, type C, is in the first place recommended for bigger excavators but is also suitable for heavy lifts within the industry. Irrespective of the position of the bucket, the lifting device remains in the hook with a 5-fold safety without stressing the lock

## Type U - For wheel loaders and front loaders

The PEJO Safety Hook, type U, is recommended for smaller excavators, wheel loaders and front loaders. The hook holds a 5-fold safety in both pulling directions. A simple and handy lock facilitates the connection and the disconnection of lifting devices. The Pejo hook can be welded on without time wasting and extensive preheating.
